

LlamaBox

Offline AI chat for Android

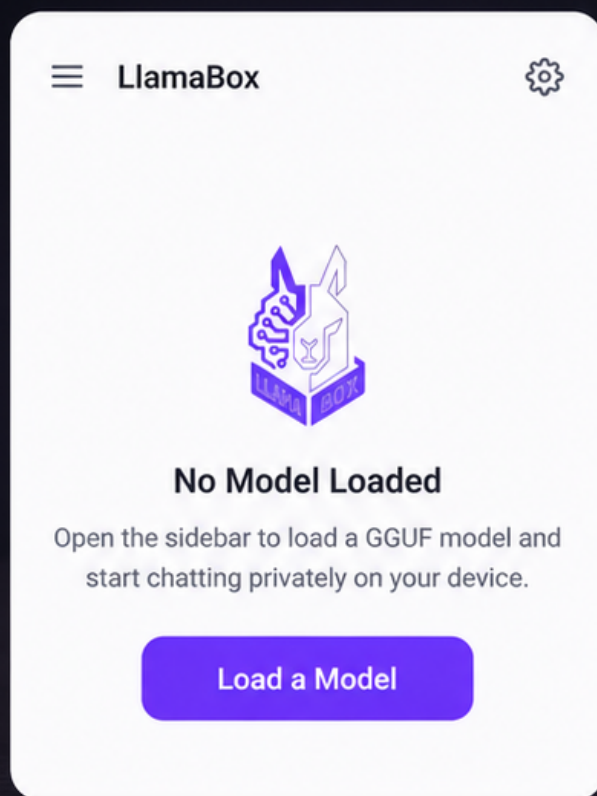

Offline begins before you disconnect.

Install LlamaBox and download a compatible model while connected. You can also import a model file.

A downloaded model still needs loading.

Open the model in LlamaBox before you disconnect.
Compatibility and available memory can affect whether it loads.

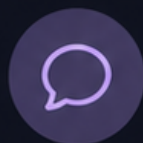

LlamaBox

Offline AI chat for Android

Then start the local conversation.

Once the compatible model is loaded,
chat runs on your phone. New downloads
still need internet.

On your phone
Chat runs locally after setup.

Your model choice
Use a compatible model.

Simple setup
Download first, then go offline.

Available on Google Play
