

A useful answer needs a brief.

The system prompt lets you describe the task, tone and boundaries you want the model to follow.

Be specific about the result.

Suggested instruction: “Explain unfamiliar terms.
Use short paragraphs. Say when information is missing.”

“ Explain unfamiliar terms. Use short paragraphs. Say when information is missing.”

A prompt guides. You still judge.

Try your instruction on a short task.
Review the result and refine the brief when needed.

Try a short task

See how it responds.

Review the result

Check and assess.

Refine when needed

Adjust your instruction.
